About us

A man in a dark suit stands with his back to the camera, looking out a window. The room is dimly lit, with a sofa and armchair visible in the foreground. The window is filled with soft, out-of-focus light spots (bokeh) in shades of gold and white, suggesting a night view or decorative lighting. The overall mood is elegant and sophisticated.

A Little Bit of History

The first mentions of concierges are from fr. concierge are found in manuscripts of the XII-XIII centuries. This was the name given to those who made sure that the candles were not extinguished in the castles. Later, they (the concierges) begin to take comprehensive care of owners and guests' conveniences of a house or palace.

The first hotel concierges appeared at the beginning of the 20th century in the Grand Hotel chain. The idea became popular amid guests and was spreading quickly.
